

Franklin Fofe Nodem

Product Builder | Software Developer

Yaoundé, Cameroon (UTC+1) · fofefranklin57@gmail.com · portfolio-franklin.pages.dev · Open to international remote opportunities

PROFILE

Product Builder and Software Developer with a multidisciplinary background in law, archival science and digital product development. Over the past three years, designed and shipped four products from idea to production — a property management SaaS, a digital publishing platform, an agribusiness venture and a logistics system. Combines software engineering, AI-assisted workflows, structured documentation and entrepreneurial execution. Available immediately for remote opportunities.

SELECTED PROJECTS

ImmoGest

Founder & Product Builder · 2024 → present

Vanilla JS · Cloudflare Workers · Supabase PostgreSQL · Cloudflare Pages

- Built a full-stack property management SaaS for real estate agencies in francophone Africa.
- Covers tenant management, rent tracking, lease generation, PDF document export and multi-tenant data isolation.
- 27 database tables, offline-first architecture, versioned migrations (V001–V014), in production since 2024.
- Subscription plan system (free → starter → pro → agency) with automated invitation workflows.

Kalamundi

Founder & Product Builder · 2023 → present

Flutter · Next.js · Supabase · AI illustration generation

- Built a two-sided digital publishing platform — author studio and reader library — for the African market.
- Integrated AI-assisted illustration generation, enabling authors to produce visuals without design skills.

AgroNova Farms

Founder & Operator · 2022 → present

Operations · Process Design · Market Validation

- Launched a catfish production operation as a deliberate market validation phase for a broader agribusiness strategy.
- Scaled production from 300 to 700 fish per cycle through iterative process optimization.
- Field experience revealed distribution access as the primary constraint — informing a future platform connecting producers, distributors and consumers.

Traficam

Product Builder · 2024

Next.js · TypeScript · Supabase

- Logistics and cargo tracking system for the Cameroonian market. Currently in development.

PROFESSIONAL EXPERIENCE

Cabinet de Recouvrement et d'Avocats Associés (CRAA)

Legal Counsel & Records Manager · 2018 → Present

- Legal drafting, contract review, litigation support and information management.
- Designed and maintained the firm's archival and document management system.

CHANAS Assurances S.A. · via Onyx Manpower Services

Records Management Consultant · May 2021 – Feb 2022

- Implemented document classification and archiving systems for internal operations.

Earlier Archival Assignments

MINESEC · Ministry of Public Contracts · NEZAFI Capital · 2018–2021

- Records organization, digitization and document classification across public and private sector institutions.

EDUCATION

Master II — Public Law

University of Yaoundé II · 2016–2018

Professional Bachelor's — Archival Science & Records Management

ESSTIC, University of Yaoundé II · 2017–2020

CORE SKILLS

ENGINEERING JavaScript / TypeScript · Next.js · Cloudflare Workers · Supabase / PostgreSQL · Flutter · REST APIs

PRODUCT Product Strategy · UX Design · User Research · Documentation-first · AI-assisted Development

DOMAIN Records Management · Legal Analysis · Archival Science · Systems Thinking · Project Management

LANGUAGES

French — Native · English — Professional

I prefer solving real problems over building technology for its own sake. Each project listed here went from idea to production — designed, built, documented and maintained independently. The full story is at portfolio-franklin.pages.dev.
